# INTRODUCING GSP COIN

Did you get tired of trading on old traditional platforms, finding out too late about amazing tokens which everyone seemed to already know about? Well, trading on GSP Coin sounds like an alternative. It's officially over for traditional trading, hoping that you don't get front run by a bot and instead, you have GSP Coin. Thanks to strong security financial engineering and clever tokenomics, GSP Coin is fairer for all investors. GSP Coin is a project that aims to build a new ecosystem for digital and mobile advertising, allowing advertisers to create and manage campaigns through our platforms with complete automation. A revolutionary Real Time Bidding system allows advertisers to gain most of the required web traffic and track the result of their investments in a completely automated fashion. The GSP Coin token will serve as the platform's internal currency and will be used within the ecosystem. The process utilizes multi layer protocol for tracking and the full platform for both encryption and interrogation of the contracts. GSP Coin goal to become an intermediary is to simplify the transparency and security process by creating an accessible gateway to blockchain technology for the digital widely spread on twitter and Commercial Payments arena.

## COIN UTILITY

GSP Coin is a Cryptocurrency, tied to Digital Advertising and Marketing. Its focus is on bridging the gap between cryptocurrencies and the digital advertising and marketing industries currently, GSP Coin (GSP) has been targeted specifically at advance tech companies in the retail industry. GSP Coin's mission is to bridge the gap between traditional finance and blockchain based transactions via its blockchain protocol. The GSP Coin token will serve as the platform's internal currency and will be used within the ecosystem. GSP Coin is a decentralized financial technology accessible to everyone that is fast, reliable and secure with negligible transaction costs. GSP Coin has its own blockchain, which is a fork of Raptorem codebase with ASIC resistant POW algorithm and consensus ensuring Smart nodes which make the network immune to 51% attacks. GSP Coin coins can be mined on both CPU and GPU. GSP Coin cares about privacy and has an integrated Coinjoin mechanism that allows to hide the balance directly in the wallet. We see our decentralized platform, incentivizing those in need, with a reward for betterment. While also creating opportunities for the rest of the platform's users,

# COIN DISTRIBUTION

Coin Symbol: GSPC

Total Coin Distribution: 6B (6,000,000,000)

Premined- 0.833333%

Algorithm: Ghost rider

Initial Block Reward: 2525

Average Block Time: 240 seconds / 4 minutes

Smartnode Rewards Activation: 5000 Blocks + 10 active Smartnodes

Block Reward Distribution:

Miner- 64%

Smartnode- 34%

Promotional and Community rewards- 2%

Below mentioned is changes in rewards distribution every 100k blocks:

Every 100k blocks rewards will increase by 100 until we reach 1100000 blocks.

After 1100000 blocks every 100k blocks rewards will start decreasing by 100 till 2000000 blocks. Smartnode Collateral will start from 1m (1,000,000) from block 5000 till 100000, similarly every 100k blocks collateral will increase by 100k till 1100000 blocks. After that it will remain constant till the last block 2000000.

# BENEFITS

## Strong security

When it comes to security and privacy, GSPC excels because of his fast and stable gateway that is backed up with his ecosystem, making him superior to others.

## Earnings from passive sources

Those that hold and control their digital wealth gain incentives.

## Scalability

Scalability is a term that is regularly used in the blockchain realm.

Computer processes can be used or generated in an infinite number of ways. GSPC demonstrates the validity of stake protocols.

Greater scalability is achieved through increasing transaction outputs and reducing fees.

# MINING AND SMARTNODE

Similar to how physical mining requires substantial efforts, mining digital assets demand computational power. As the name implies, a mining pool is a group of miners. Individual miners agree to combine their computational power and work together to increase the chances of solving puzzles faster to access mining rewards. If the pool succeeds in finding a solution, they share rewards amongst the members. Each member receives rewards in proportion to their contribution to the pool. A mining pool acts as a coordinator and assigns work units to all the members of the group. The mining pool work involves managing members' hashes, recording the work performed by each member, and distributing rewards. Each miner receives unique work units to avoid overlapping.

Smartnodes are responsible for storing and executing smart contracts, having nodes handle contracts rather than adding them to blocks greatly reduces the chances of scaling issues, like Ethereum has been experiencing. In addition this also allows larger smart contracts and a wider variety of languages that can be used to create them.

You can find the list of mining pools to mine GSPC on Mining Pool Stats.

# COIN UTILIZATION

Our payments platform is designed to increase conversion and reduce fraud at every step of the payment flow. Get access to streamlined checkout flows, fraud prevention, issuer-level optimizations, and more so that you can focus on building the next big thing. Activating payment mode exclusive to GSPC on all our business platforms instead of USD is our key target in last quarter of 2022.

# OUR MISSION

## OUR MISSION IS AS FOLLOWS

**GSPC's** mission is to provide a decentralized, user-friendly

- ✓ platform that is highly secure, enabling users to earn high-risk-adjusted returns.
- ✓ As our customer base grows, we must be able to do everything we want to do in the market. This coin will give us the ability to do it all with more flexibility, ease of access and fewer restrictions on geographical location.
- ✓ Our goal is to develop GSP as a widely available, widely accepted method of trading digital ads tokens.
- ✓ The primary goal is to pay the suppliers and accept payment from clients in GSP Coin instead of using the USD.

# WHY CHOOSE GSP ?

## Secured User Data

Because our engineers care deeply about privacy and security, GSP Network will never use or sell the data of its users. We don't want to resemble the vast majority of social media sites. Only you have access to your personal information.

## Interference Free

Transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization and waiting period requirements.

## Users Value Focus

Using the GSP network, users can easily submit material, sign it, and make money from it. You shouldn't give away your material so that companies may benefit from it. It's time to reclaim power.
